INTERNATIONAL RAIL MANAGEMENT

Master of Business Administration (MBA)

DB Rail Academy

SCHOOL OF INTERNATIONAL
BUSINESS AND ENTREPRENEURSHIP
STEINBEIS UNIVERSITY

Study Program

MBA in International Rail Management

Establishment
of an international
network

Future
Foresight

Systematic
competency
development

Our MBA in International Rail Management combines general management, personal competency development and the fundamentals of business administration with a specialization in rail management. As part of the program, students work on projects that focus on industry-specific challenges.

The interdisciplinary content is provided by SIBE. The industry-specific seminars are provided by Rail Academy of Deutsche Bahn. In this combination, the MBA program offers a holistic approach for railroad companies worldwide.

During the entire course of your studies you will be supported by permanent contact persons from SIBE of Steinbeis University and DB Rail Academy.

Our Experience Based Curriculum (EBC) guarantees long-term learning effects by trying things out under real conditions with the support of experts instead of just learning by heart. In your partner company you work on your own innovation project.

Thus, a combination with a responsible full-time position in companies and an individual career planning is possible.

The focus of the study format is therefore on your own project implementation. You will be embedded in a close network of diverse sparring partners who will accompany you intensively on your way, e.g. in weekly discussion groups. Variety is provided by the task and media diversity on the e-campus.

Furthermore, the SIBE graduates impress with the following results in the alumni survey three years after completing their studies:

95 % of the alumni evaluate the Experience Based Curriculum (EBC) as good to very good.

57 % of alumni have a management position three years after graduation.

9 % of all alumni have founded a company within three years after graduation.

67 % of the acquired alumni are still with their project companies three years later.

DB Rail Academy derives its strengths from DB's centralized, highly specialized organization with the following key facts in Germany alone:

26,000 trainings for **270,000** participants p.a.

3,000 different technical & soft skill courses

19 full motion simulators in **12** simulation centers

36 operational and technical practice facilities

96% recommendation rate

Onboarding for **25,000** new employees p.a.

Trainings in over **30** countries

Innovative

- Ensure value-adding innovations in your company with real-world projects!
- Our interdisciplinary faculty provides the necessary scientific impulses!

Cooperative

Together we are prepared for every challenge, therefore we focus on:

- Peer mentoring with fellow students
- Individual support by the university
- Exchange with the Business Mentor

Interactive Study Format

Diverse

DB Rail Academy

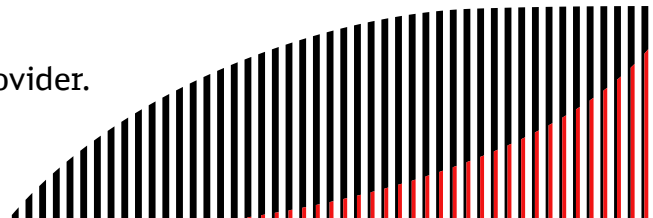

DB Rail Academy, the international training provider of DB Engineering & Consulting, has the objective of meeting individual needs for high-quality training and education in the transportation sector worldwide. In view of the rapidly increasing demand for international training, our customers rely on the experience gained from 185 years of successful rail business in Germany. Our customers benefit from our holistic training and competence management solutions in all areas of transportation, from the analysis of training needs to the operation of academies with a wide range of training and development programs for the experts of tomorrow.

“We are very proud to launch this new cooperation program with SIBE, linking academic education from innovation to entrepreneurship and hands-on practical experience from 185 years of Deutsche Bahn’s successful railway business.”

*Heiko Scholz
Global Director DB Rail Academy
Head of Competence Consulting*
